Pseudo color image processing consists of assigning colors to grey values based on a specific criterion The principle use of pseudo color image processing is for human visualization Intensity slicing and color coding is one of the simplest kinds of pseudo color image processing Grey

level color assignments can then be made according to the relation where  $c_k$  is the color associated with the  $k$ th

### Color Image Processing - ImageJ

A color composite image is similar to the color images one would find in the image processing software Photoshop. In Photoshop these images are made of "layers", and in Fiji they are made of "channels". Both "layers" and "channels" are the same idea. The advantages of using this type of image instead of RGB images include:

### Color Image Processing - University of California, Irvine
